

RELY ON THE PREMIER PROVIDER IN CORE WIRELESS SOLUTIONS

For extremely robust, reliable technology solutions, you can count on Interop Technologies. We're the premier provider of core messaging, device management, and connectivity gateway solutions to the global telecom industry.

Our high-performance solutions power SMS, MMS, short code, mobile Internet access (WAP), and device management services delivered to millions of wireless customers every day. These complete solutions include all the hardware, software, and support you need to offer the latest services to customers.

PROFIT FROM OUR UNIQUE APPROACH

Our modular, distributed architecture provides massive scalability to support today's high-volume demand and is future-proof to support tomorrow's technology and networks.

➤ We're the only company in the industry with complete ownership and quality control over all its technologies. We design, build, and support our own solutions, and they're the only ones we sell. We provide carrier-grade, "five-nines" (99.999 percent) reliability across the board.

➤ We're the only provider with flexible hosted and turnkey deployments that reduce costs in a tough economy. Unlike other providers, Interop enables you to migrate easily from hosted to turnkey as your business needs change—without changing technology platforms and risking service disruption.

➤ We're the only provider that makes billing so simple. Our single, unified billing feed flexibly integrates with your current billing platform and supports all our solutions. Set it up once, and you're done. Add as many of our technology solutions as you choose.

Our flexible technology, deployment, and billing approaches provide a sustainable competitive edge to help your business thrive even in the toughest environments.

BENEFIT FROM OUR EXPERIENCE

Interop's founders are wireless industry pioneers. Our leadership team has decades of background as wireless operators and vendors. We understand what you experience every day because we've been there. We're in the field constantly, and we are our own customer, since we host the solutions we build.

We're very knowledgeable about the technology, migration, and back-end integration problems common in wireless. We build Interop solutions specifically to resolve these problems. We provide flexible, affordable solutions that work exceptionally well with your legacy infrastructure and fit your technology roadmap for the future.

Simple Migration

We'll Host Until You're Ready to Buy and Manage Our Turnkey Solution

Don't allow a decision based on today's financial constraints to dictate your long-term strategy.

Unlike other hosting companies, which can only provide long-term hosted solutions, we can easily migrate your services from our hosted to turnkey solutions. When your business needs change and you decide to migrate, we do it fast.

The technology and support—as well as interfaces for users, customer care, billing, and reporting—are exactly the same for hosted and turnkey. With other providers, disruption occurs from switching technologies, vendors, and tools, often just as load is peaking.

Interop is the only provider offering a simple migration path from hosted to turnkey. No other company provides so much deployment flexibility.

See Why We're Better

JOIN OUR SATISFIED CUSTOMERS

Since we started Interop in 2002, our satisfied customers have helped us grow rapidly with repeat business and referrals. We currently have 160 deployments with more than 55 operators in North America, Latin America, and the Caribbean. Our company is headquartered in Fort Myers, FL, with facilities in Atlanta, Dallas, and Guatemala City.

Interop is a proven business partner with solid technology and deep expertise in wireless. While other vendors are retrenching, we are profitable and financially sound, expanding, and actively planning additional growth worldwide.

MASSIVE SCALE

Interop solves your volume problems with unlimited scalability. We use the latest in parallel processing and load balancing techniques to provide more than enough speed and capacity—now and in years to come.

FLEXIBLE DEPLOYMENTS

Choose the deployment that suits your business conditions:

- Hosted—Share technology in a service bureau environment.
- Modified Hosted—Deploy our solution at your site without capital expense, and we manage it for you.
- Turnkey—Purchase our solutions outright for on-site deployment.

You'll get the same technology solutions, network monitoring, and quality support with all three options. Plus, we can customize the modified hosted and turnkey deployments for your specific applications.

RESPONSIVE SUPPORT

Have a question or need advice? Seasoned technical support personnel provide knowledgeable and fast support.

PROVEN PARTNER

Interop has a proven track record and is a trusted business partner. We're well positioned to support the next generation of wireless technologies and customers.
