**CAROLINA WEST DEPLOYS KODIAK REAL-TIME EXCHANGE SYSTEM
TO ENABLE ADVANCED VOICE SERVICES**

*CDMA Network Operator Maintains Competitive Edge
With Innovative, Instant Voice Offerings*

San Ramon, CA and Wilkesboro, NC – February 7, 2005 – Kodiak Networks, the leading provider of advanced wireless voice systems, announced that Carolina West Wireless, a local wireless network operator serving the northwestern area of North Carolina, will deploy the Kodiak Real-Time Exchange™ System to enable premium voice services, including push-to-talk (PTT). The rural wireless telecommunications company, which provides cellular and pager service to six counties, will roll out the Kodiak-enabled service across its territory in early 2005 with a target commercial launch date of mid to late March. Carolina West is the eighth commercial network operator worldwide to deploy the Kodiak RTX System.

The all-IP, packet-switched Kodiak RTX System supports premium offerings that go beyond standard "walkie-talkie" or basic cellular service. Subscribers in the Carolina West service area can experience advanced features including instant availability, instant calling, and real-time updates of personal and group contacts, directly from the handset.

With a current count of seventy (70) cell sites in its rural markets, and an aggressive, continuing build-out plan, Carolina West Wireless is capable of providing better coverage for PTT service than its competitors.

"We are dedicated to providing innovative communications choices to our customers," said John McMillan, General Manager, Carolina West Wireless. "Businesses including timber, agriculture construction, hospitals, and real estate companies can particularly benefit from the speed and convenience of advanced voice services. It also will have great appeal to consumer groups such as families, young people, and students. In addition, these Kodiak-enabled services will help us continue to differentiate our offerings from the competition."

"Kodiak's highly scalable technology enables network operators of any size to offer voice service features and performance that set the standard in the industry," said Richard Henderson, vice president of sales, Americas at Kodiak Networks. "We will work with Carolina West to ensure that its subscribers begin benefiting from this breakthrough technology as rapidly as possible."

About Kodiak Networks

Kodiak Networks (www.kodiaknetworks.com) is the leading advanced wireless systems innovator for network operators worldwide. The Kodiak Real-Time Exchange™ (RTX) System is a technology breakthrough, enabling operators to deliver premium, integrated wireless voice services to their customers.

Kodiak Networks offers both GSM and CDMA instant voice systems that can be easily scaled from independent operators to multinational carriers. The Kodiak client is available on handsets provided by Nokia, Motorola, Samsung, TCL/Alcatel, Kyocera, LG, PalmOne, Sagem and other leading manufacturers. Kodiak has relationships with several other global providers of handset technology and has numerous patents pending in the areas of high-speed packet switching, signaling and call control. Headquartered in northern California, Kodiak is a global organization, with facilities in Dallas, Texas; Bangalore, India; Swindon, United Kingdom; and Beijing, China.

About Carolina West Wireless

Headquartered in Wilkesboro, North Carolina, Carolina West Wireless (www.carolinawest.com) provides wireless telephone and pager service to a six-county local service area in North Carolina. Carolina West Wireless was the first carrier to bring wireless products and services to the people in its markets. The six counties include Avery, Watauga, Ashe, Alleghany, Wilkes and Surry. Using roaming agreements with providers throughout North America, Carolina West Wireless customers may use their wireless phones in most areas of the United States and Canada.. Carolina West Wireless is jointly owned by Skyline Telephone Membership Corporation headquartered in West Jefferson, Surry Telephone Membership Corporation headquartered in Dobson, and Wilkes Telephone Membership Corporation headquartered in Wilkesboro, N.C. Carolina West Wireless was incorporated in 1989 through the foresight of its three parent companies.
